Lowered hearth

The lowered hearth allows positioning the bottom rim of the insert 170 mm above the ground.

It is necessary to empty the ash tray more often when operating.

Hanging Accumulator

When transporting the fireplace insert after removing the packaging, the hanging accumulators can be removed for easier handling and re-inserted after placing and setting up the insert.

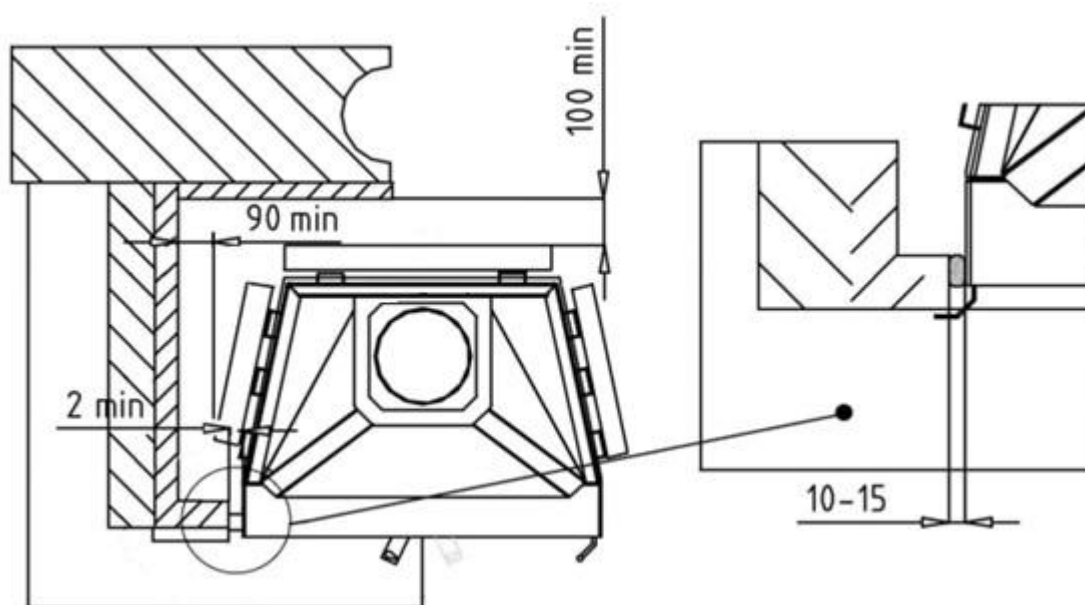

Procedure:

1. Hold the accumulation board against the fireplace insert, remove the upper board holders.

2. Remove (lift up) the accumulation board from the lower brackets.

To assembly – reverse the procedure.

For hot-air fireplaces it is necessary to ensure sufficient air flow around the fireplace insert.
